

# Project: Mouse Trap

Design a mouse trap using your robotic kit and your computer.

With your partners, research, talk about a design and draw a picture and/or use words to describe your idea. Make sure you can actually build your idea using your Robotic kit.

Add a sensor to start your trap automatically.

## Report

Write the project report by answering these questions:

1. Who was in your team?
2. What research did you do? Include any useful links to websites.
3. How does your Mouse trap work?
4. What problems did you have and how did you fix them?
5. What did you learn?
